## CAMPAIGN ON STRONG

Trash and Garbage Hauled Away—Take West Tulsa and City Jail First.

A general invitation to Tulsa men and women to hear an address of sanitation by Dr. Dixie E. Tucker, special rural sanitary inspector for Oklahoma, at a meeting of the Tulsa Civic League at 10 o'clock this morning in the public library was extended yesterday by Mrs. Lillian L. Lindsay, president of the league. Dr. Tucker is the only state officer in the country with this position and is qualified to give an enthusiastic and well-informed talk on the need and securing of sanitation. She is stationed at A. & M. college at Stillwater.

P. L. Long, chief sanitary inspector for the city health department, will be present this morning and will give any information required as to the manner in which the health department is co-operating in cleanup work. Mrs. E. L. Merry, director of cleanup work for the Civic League, will also report progress. A short business session of the league will precede the public meeting.

The city cleanup started with energy yesterday. The health department being besieged during the day with telephone calls from people who had cleared their premises and wished trash and garbage hauled away. Improvement of sanitary conditions in West Tulsa is being effected by the health department by the cleaning of cisterns and storm sewers. The city jail has also been cleaned up at the order of the department.

John M. Lindly, boy scout executive, has volunteered the services of the boy scouts to do cleanup duty one afternoon during the week.

## H. C. L. SLAPS MOTORISTS

Advance in Price of Gasoline and Oil Announced by Standard.

NEW YORK, May 10.—Motorists today became the latest victims of advancing prices.

The Standard Oil company of New York announced that the price of gasoline in garages would be raised to 30 cents a gallon, an increase of 1 1/2 cents, while independent dealers were reported to be quoting "gas" as high as 32 cents. This, it was said, would mean that the retail price would be at least 34 cents. Today's advance brings advances since January 1, to 22 per cent.

But price advances for oil products were not confined solely to gasoline. Prices on virtually all oil products continued to rise in various sections of the country based on the extension of the long sustained demand.

Reports from the middle west and southwest, as received in the financial district, indicated further upward revision of price schedules for practically all grades of crude and refined products.
